

Training on Vermicomposting for farmers organized at ICAR-NRCE

Under a special campaign for propagating and encouraging organic farming one day training on Vermicomposting using equine dung was organized at ICAR-National Research Centre on Equine, Hisar on June 29, 2018. The farmers of adopted villages under Mera Gaon Mera Gaurav were educated regarding importance of organic manuring and controlled use of chemical fertilizers. During this occasion a team comprising Principal Scientists and technical officers from the centre interacted with the farmers. Expert lecture was delivered by Dr. Hema Tripathi on vermicomposting and organic farming. About 10 farmers attended the programme from villages Gurana, Kajla and Kharia of Hisar District. A team of students of Agriculture discipline from different parts of India visiting NRCE also interacted with the scientists and farmers. Dr. B.N. Tripathi, Director, ICAR-NRCE emphasised on organic farming in agriculture. The NRCE team also responded to various queries and answered question of farmers. The toll-free helpline number of ICAR-NRCE 1800-180-1233 was provided to farmers for future assistance.
