

Four days hands-on training program on 'Diagnosis of Zoonotic Bacterial and Viral Infections' inaugurated at ICAR-NRCE, Hisar

A four days training program on 'Diagnosis of Zoonotic Bacterial and Viral Infections' has been inaugurated at ICAR-NRCE, Hisar under the umbrella scheme of "National One Health Program for Prevention and Control of Zoonotic Diseases (NOHPCZ)" supported by NCDC, New Delhi. This training has been scheduled from 31-01-2023 to 03-02-2023 and a total of 30 Medical, Veterinary Professionals from Uttar Pradesh state and 5 Technical staff from Haryana have enrolled for this training.

Sh. Jaibir Yadav, SDM Hisar graced the inaugural function of this training programme as Chief Guest. The inaugural function was started with plantation activity at the institute campus. Sh. Yadav appreciated the efforts taken by ICAR-NRCE in control of zoonoses and urged the participants to make use of the expertise and facilities available at ICAR-NRCE, Hisar for implementation of a better one health programme in their region.

Dr TK Bhattacharya, Director, ICAR-NRCE briefed the participants about the research work being carried out at ICAR-NRCE and also the role of ICAR-NRCE as a Regional Co-ordinator. He emphasized the importance of inter-sectoral collaboration and asked the medical and veterinary professionals to work together in a coordinated manner for the control of zoonotic diseases in their state.

Dr Harisankar Singha, Regional coordinator, NOHPCZ stressed on the importance of One Health programme for the control of existing and emerging zoonotic diseases in the country. Dr Shanmugasundaram, Organizing secretary welcomed all the participants and briefed them about different activities planned during the course of training.

The inaugural programme was attended by 65 people comprising of Medical and Veterinary professionals and other staff of ICAR-NRCE.

The programme ended with a formal vote of thanks.
